

MANTHAN GRAMIN EVAM SAMAJ SEWA SAMITI

Organization Profile:

MANTHAN is a professionally managed social organization, working for last several years in the field of skill development in various states of India. Manthan is proud to have highly qualified and skilled technocrats working with true dedication for socio-economic upliftment of rural community and their economy through Technology Transfer and Entrepreneurship development and has the adequate infrastructure and skilled manpower for imparting training programs. We are associated/partnered with NABARD/CAPART/MoRD/NIRD, BHEL etc. We have so far completed various projects with Ministry of Rural Development (MoRD) and state government for skill development.

The total trained beneficiaries are 21,000 out of which 16,000 are placed in various industries/companies. Similarly with NABARD we have successfully implemented REDP.

In order to strengthen the segment of skill development in MP, we have established Industrial Training Institute in the Village- Amlaha of District - Sehore (M.P). Where adequate facilities are provided for Electrical, Fitter, Automobile, Computer, Welder and Civil trades. This is the biggest Institute in the state of Madhya Pradesh and has been awarded by the Governor in the **III NATIONAL MADHYA PRADESH EDUCATION SUMMIT & AWARDS 2016 ORGANISED BY CMAI ASSOCIATION OF INDIA.**

The skill development activities is not limited with MP but includes other states Odisha, Jharkhand, Bihar and Chhattisgarh. We have regional offices in Odisha, Bhubneshwar and Khargone. In addition to Skill Development activities we have very strong wing for agricultural technology interventions program.

We are empanelled with TISS, Mumbai and also a nodal agency for Sanitation (Swachh Bharat Abhiyan) under PMO, Government of India.

The annual turnover of the organization is more than Rs. 10cr.

Overview

Manthan is a social organization which is registered under registrar and firm society Act 1973 and founded on 06/10/2000. The main manifesto is to work for rural community specially women empowerment, farmer community development, skill development and so on. We have a team of professionals those are sincere and dedicated. In order to deliver the desired results we have created the infrastructure for R&D facility for Agriculture research and training facilities for the empowerment of the rural youth.

Today, Manthan captured a key position at the national level in the field of skill development, agriculture technology development and financial inclusions.

In the skill development Manthan Private Industrial Training Institute (MPITI) scored number one position in the state (M.P.) for resource management and quality training is concern. Further the organization strengthen the skill development process through establishment of Diploma, Engineering (polytechnic) Institution in village Amlaha of district Sehore (M.P.).

This is the first model of the state where ITI and Polytechnic co-exists in the same Institute for imparting the trainings on various need based modules. Recently NSDC also joins the hands through their popular NSDC-STAR scheme for training, certification and gradation of mass scale people through their various sector councils.

This all achievements leads to innovative consultation methods, personal commitments and dedication are the crux for the success of each ventures. Manthan team encompasses knowledge, experience and international exposure as well. Our team always adopts an approach for solution to the problem.

VISION

We are committed for sustainable development of less privileged and marginal section of the community through interventions like skill development, agriculture technology intervention, income generation activities, water and Sanitation, health & hygiene concerns and natural resource management.

MISSION

Working for sustainable and overall rural development of marginalized and socially deprived population.

AREA OF SPECIALIZATION

- Skill development.
- Natural resource management
- Watershed development
- Water and sanitation
- Project auditing
- Monitoring and Evaluation

TRAINING FOR BACKWARD CLASS AND MINORITY

The state Government under the ministry of Backward classes and Minority has assigned the task for imparting trainings to 200 youths which represents to this specific category . The trades which we identified are as Electrical, Fabrication-Welding and Computer.

MoRD-SGSY-AAJIVIKA SKILLS

The Ministry of Rural Development has sanctioned a project under Aajivika skills in the year 2012-13 and this was continued up to 2013-14 and 2014-2015. In the project of Bundelkhand we have trained 7800 and placed 5850 students. Similarly, in the second project CG, Jharkhand & Orissa which was sanctioned in the year 2013-14 and continued up to 2014-15 and 2015-16. we have trained so far more than 7800 students and placed around 6000 rural youths. In Ajeevika project the mobilization of youth is most importance factor where village meetings, participation of PRI is been ensured .Similarly, while survey we have identified the available resources of each target district and framed this strategies to harness the potential. The data was useful in exploring the opportunities for jobs within or outside the district.

WADI - NABARD

Under this project of NABARD we are continuing with three projects which is mainly in Bhagwanpura block of district Khargone and Alirajpur block of district Alirajpur. In Bhagwanpura we are working with two projects i.e 500 and 1000 wadis. In the first project we have already completed the plantation of 500 wadis and now we are concentrating for growth, promotion techniques and required operations for more livelihood opportunities. Similarly, in the second project we have accomplished 300 Wadis in the first year and also accomplished other major activities specific to water harvesting, seed production, health techniques and so on . Similarly in Alirajpur we have accomplished the plantation of 500 wadis and now concentrating on the other aspects specially capacity building of community, water harvesting and activities which can support for incremental growth of traditional crops.

CSR ACTIVITY — BHEL

The main objective of this activity is to improve social economic conditions of the tribal farmers of Bhagwanpura block of district Khargone and prevent the migration of farmers. At the present scenario tribals are adopting the traditional crops with no scientific input into the fields, therefore they are deprived of getting their dues and this resulted into migration to meet out their needs.

We have introduced high tech cultivation of vegetables crops which have short handsome money after the interval of 30 days and required farmers engagement throughout the crop period. The experiment with 100 farmers with 100 acres of land changes the scenario of the village economy because of more economic gain and this technology also disseminated very rapidly in the adjacent villages. We have submitted the report of pilot project and it is expected that we will increase the periphery and customer base in the ensuing season. Now we are implementing the project with 500 farmer in the phase manner i.e., 160,170 and 170 farmers

CSR ACTIVITY

- Recently we have joint venture with Schewler Electrical Mumbai for skill development initiative in the state of CG and Jharkhand.
- Similarly, TJSCO in Ranchi is also likely to join hands for training of their SHG market development.

DDU-GKY (NABCONS)

MoU has been signed with NABCONS and SRLM for implementation of Aajeevika Project in Madhya Pradesh. In this project we have to train 4200 rural youth and accordingly we have to place them in the various companies with the adequate wages. The funds of rupees 3,65,16,300 has been released which was 25% of the total cost of the project. This project was implemented in the various districts viz., Mandla, Dindori, Shadol, Seoni, Anupur, Jabalpur, Singroli and Sidhi. The centers were established as per the SOP guidelines.

MANTHAN POLYTECHNIC COLLEGE

Manthan Polytechnic College is the new initiative of MGSSS. MGSSS has realized that there is a need of value addition for ITI beneficiaries and also realized the need of more advanced skill training modules and this can be realized through the higher degree of skill intervention. MPC has been crowned with the affiliation of AICTE (GoI) in the year 2013-14. At present the sectors which have been identified are Electrical, Mechanical, Civil, Telecommunication, Computer Science and Electronic. It's a matter of pride that

today MPC is not only catering the demand of the adjoining villages but also feeding various districts of M.P.. This trend has changed the conception that rural youth has to migrate in urban towns for better quality education. MPC has changed the concept and for that we feel proud.

MANTHAN PRIVATE INDUSTRIAL TRAINING INSTITUTE

(MPITI) MPITI initiated its activity in 2005 and today its a matter of proud for Manthan and also proud for the state . This is the first Institute of state which is providing the quality training in the rural area .At present MPITI is providing trainings for ITI sector specially for Electrical, Fitter, Welder, Civil, Surveyor, CoPA and Diesel mechanic. MPITI has so far trained around 10000 . . . rural youth

under various sectors. In addition to training and certification we have explored the placement opportunities for around 7500 rural youths.
